SYcamore 1-7496

7595 Montgomery Rd.      Cincinnati 36, O.

## Foreword

Daylilies have again shown their ability to grow and bloom under adverse conditions. When other plants show signs of drought and bloom poorly, daylilies go right ahead.

We have received many complimentary letters on the quality of stock sent, and their pleasure in our introductions. We will endeavor to send good plants at all times. All freshly dug to order, no storage plants supplied at bargain prices.

**Key to Symbols:** E—early; EM—early mid-season; M—midseason; LM—late midseason; L—late. EXT means extended bloomers, lasting until 10:30 p. m. RE means reblooming in fall. Varieties showing green foliage in winter are marked EV. Numbers following the name as "EVADNE (51) 48" indicates year of introduction in parenthesis and the height of the plant in flower, in inches.

Our blooming season begins in mid-May. Mid-season varieties have larger flowers and their season is from the middle of June until the second week in August. Late ones bloom from August until early October. The time of bloom given is for this locality.

**Culture:** The plants bloom best in a sunny location, but will take shade for half a day. They need moisture before and during the blooming period to produce larger and finer blooms. Allow two feet between plants in normal growth. Reset and divide in early spring or after their blooming period in August until late September. In planting, place the crown a little below the surface, and spread out the roots. Old or dried manure and compost with some bonemeal added induce a good root growth and large flowers. Avoid chemical fertilizers or those high in nitrogen as the color of the flowers are then often not normal.

**Fragrance:** All evening bloomers and the lighter yellows (00-5) are fragrant. Also nearly all in the yellow and orange shades. Pink, red and bicolor varieties do not seem to have it, or only in a limited amount.

**Color Listing:** Varieties are placed in color groups. Few people have color charts, and do not know the depth of the color from descriptions. Yellow comes in many shades, some greenish as barium and citron yellow, or lemon in color. There are the pure yellows and some are gold or orange in coloring. As the old Betscher hybrids are well known, and have wide range in the yellow and orange shades, they were used as a basis for depth of color and begin with "1". Flowers lighter in colors are marked "O" or "OO" for a paler shade. Other varieties having the same color number may be entirely different in form, size of flower, or height. The numbers are used only to help you select different shades in the yellow color range. Pink, red shades and color patterns are marked L, M or D before the name, indicating whether they are **light, medium or dark** in general coloring. Advise if this method is helpful to you.

**Transportation:** **Strong, single divisions** are sent postpaid. Local orders can be dug anytime, if the weather allows, but those for shipping are sent in early spring until mid-May, and after the blooming season until October. Those listed for fall delivery are sent after the middle of August. No orders are accepted under \$2.00. For orders under \$3.00 add 25c for postage and packing. Add 20c extra for special handling. **Ohio** purchasers please add **sales tax**.

**Seedlings:** Each year new varieties are developed, showing improvements in form and color. Of these, only a few are set aside for further testing. Do you want a thrill? Then try some, all will bloom this year. You will receive colors that are not possible in named varieties at the same price. Only sent after blooming season.

**Fine Mixture:** Includes all colors in balanced mixture, 8 for \$2.50 postpaid; 20 for \$5.00; 50 for \$10.00, express collect.

**Aristocrat Series:** An extra fine selection, labeled as to color. Six different for \$3.00; or twelve different for \$5.50, postpaid.

**Location:** We are located on the CCC Highway (State Route No. 3) about three squares beyond Kenwood Road if coming from Montgomery. You are cordially invited to visit the garden at any time.

## Introductions

These seedlings have been carefully selected as being distinct and better than known named varieties. Two descriptions are given for these varieties. The colors are taken from Ridgeway's chart for the first description, and are intended for those who want exact colors. The second one gives the general color most people would see in the flower. All pale yellows introduced are distinct in form and growth.

### 1955 INTRODUCTIONS

**CHAMOIS GLOW**—36" July-Aug. LM. An unusual blend that women like. Opens a pure chamois color, sepals paler, a greenish yellow. Later the flower has a silvery lavender pink overcast that enhances the basic color. There is a deeper pink flush on the petals near the center. Large light green throat. Difficult to describe, as the colors blend and change as the flower ages. Have seen none like it. Broad overlapping crinkled petals. Free Bloomer. Only a few available .....\$7.50

**GREEN CHALICE**, 42" July-Aug. LM. A Companion plant to Chamois Glow and brings out its subtle coloring. Wide spreading broad petals of pinkish cinnamon veined purplish red and a V blend of darker shade at the center. Sepals are of the same color. Large star-shaped deep green throat. A decided pink coloring. Branches widely.....\$5.00

**HALLELUJAH**—42" July. M. That seemed to be the proper name for this outstanding red. Compared it to other fine reds, and liked its rich vivid coloring better. Velvety dark Nopal red, a shade deeper than scarlet red. Widely open flowers face upward. Sepals recurve slightly. Small green throat. A brilliant unfading red with an iridescent underglow. Full of life. Free bloomer.....EXT. \$10.00

**HULA DANCER**—24" July M. A spidery open flower like the wide-spreading whirling skirts of a dancer, with twisted and curled edges. Petals are a light carrot red, veined Eugenia red (a light purplish red) with a deep V zone of same color. Sepals slightly overcast carrot red, pale edges. Deeply crinkled. Throat light cadmium with a lemon green center. Holds color. Many women wanted this, but never had enough stock to offer it before.....\$5.00

**INCA GOD**—38" July-Aug. LM. Large flowers 6 1/2" across with widely open segments of orange yellow. Crinkled petals. Small green throat. Unfading. Noticed its size and heavy substance, larger than any seen. You will like it.....EXT. \$6.00

### THE FOLLOWING VARIETIES HAVE BEEN INTRODUCED FROM 1943-1954

**L** **ADMIRABLE** (50)—36" July M. Light buff yellow petals closely veined and flushed light purplish red, broad zone of same color at center. Lemon throat, greenish center. Sepals paler. A broad, slightly reflexing pink toned flower.....\$3.00

**2** **APOLLO** (46)—45" July-Aug. LM. Lemon chrome, a shade more golden than Hyperion. Broad overlapping flower. Good branching.....EXT. \$1.00

**M** **ANNA GARRY** (52)—38" July-Aug. LM. Light apricot gold, with a long V zoning of dark terracotta rose. A lovely recurving flower with fluted petals. Green center, with yellow star at throat. Better color than Cathedral Towers ....EXT. \$4.00
